

## extra Wallpaper Adhesive Normal extra Tapetenkleister Normalkleister

**Instructions for use:** *extra Wallpaper Adhesive Normal* is suitable for pasting light to medium weight wallpapers.

**Technical specifications:**

Components:	carboxymethyl cellulose, starch ether
Apparent density:	approx. 0.40 g/cm <sup>3</sup>
pH-value:	approx. 8
Solubility:	ready to use in 30 minutes
Usage:	approx. 200 ml/m <sup>2</sup>

**Surface preparation:** The surface must be dry, firm, dust and grease free. Remove all old, loose wallpapers and distempers using *PUFAS Wallpaper Remover*. Make good cracks and holes with *PUFAS Interior* or *PUFAMUR Super Bonding Filler*.

Pre-treat highly absorbent, sanding and chalking surfaces with *PUFAS Deeply-Penetrating Primer – solvent free*. Water-soluble contaminations in the surface, which could show through when wallpapered over, should be isolated using *PUFAS Insulating Spray White*. We recommend applying a sub-coat of *PUFAS Wallpaper Primer-White* before hanging highly translucent wallpapers and where surfaces are highly contrasting.

**Application:** Stirring vigorously, sprinkle *extra Wallpaper Adhesive Normal* into clean, cold water and continue to stir for a short time. Leave for 30 minutes and then stir vigorously again.

Evenly apply the adhesive to the wallpaper using a brush. Fold the pasted ends inwards and hang after an adequate soaking time. Always observe the wallpaper manufacturer's instructions for use.

Do not use if the surface and room temperature are below + 5° Celsius!  
Remove adhesive residues using a damp cloth.  
Clean tools in water after use.

**Mixing ratio:**

for	Mixing ratio	Quantity of water per 125 g packet	Coverage of a 125 g packet
Pre-pasting	1:80	10 l	60-80 m <sup>2</sup>
Lightweight wallpapers	1:52	6.5 l	35 m <sup>2</sup>
Heavy wallpapers	1:48	6.0 l	30 m <sup>2</sup>

**Storage:** Store in a cool and dry place!

**Available size:** 125 g collapsible box 000808080
